

SET-UP GUIDE

ProtectIQ: Network Security

If you subscribe to ProtectIQ Network Security, it is working quietly in the background on your GigaSpire to provide an extra layer of protection against malicious traffic.

Data coming into your network will be scanned for viruses and other malicious content and you will receive a notification if content was blocked for some reason. This will show as a notification within the ProtectIQ main menu item in your app.

No action is needed when you receive an alert. These threats are automatically blocked from entering your network.

Note: Do not remove device level protection for anti-virus and malware.
